

TECHNOLOGIES FOR LEARNING

a professional development framework

'Technologies for Learning' is a resource designed to guide the professional development of Vocational Education and Training (VET) educators. It is reusable, customisable and aligns with TAADES503B Research and design e-learning resources in the Training and Assessment Training Package (TAA04).

Use it:

- to guide your own professional development, or
- as a staff capability resource.

The units, Begin, Explore, Discover, Plan and Develop focus on the key areas:

- Learning approaches
- Learning design
- Learning facilitation
- Learning technologies
